At the Fourth level include a French

Grammar program to continue in the proper level of comprehension and in teaching the

French language skills.

**ACE PROMOTES
BI-LINGUALISM**

For years Accelerated Christian

Education Canada has promoted the use of the first three levels of French PACES in a bi-lingual study track. This format enables a student to begin their educational career in a French environment, switching them over to an English course load by grade four. The school would then provide a supplementary French class to maintain their French grammar skills so by grade 12 the student would graduate being fluently bilingual. This study track has been proven to be effective in the French province of Quebec, Canada, where it has been used for over 15 years. This brochure will explain the path of the study track, showing the merging of the French and English curriculum.
